Our organisation

From our manufacturing facility in Halesowen, situated right in the heart of the industrial Black Country, we operate a varied range of Forging Presses and Hammers which gives us a unique capability to manufacture components from as little as 1 Kg to 80 tonnes with lengths up to 23 Metres.

Our Machining and Engineering facilities compliment the range of forgings we produce offering Turning, Boring and 5 Axis milling, which enables us to supply fully finished components ready for installation. We have the ability to machine products right up to 100 tonnes.

With continuous investment Somers combines the latest technology with traditional quality skills to compete and thrive in a very diverse global market. At first you may think you have never come across our products
but from the deepest oceans to outer space our forgings are pushing the boundaries of manufacturing excellence!

Our activities are overseen by our Board of Trustees who have ultimate responsibility for all that we do. Somers Forge Limited day-to-day management resides in the Executive Board which reports directly to the Board of Trustees.
